

Fact-Checker Training

 Green Level: I Want More Support

Name: _____ Date: _____

What I Learned

Optical illusions show us that our **eyes can be tricked**. If pictures can fool us by accident, some people might try to fool us **on purpose**. But we can learn to spot tricks!

My Fact-Checker Checklist

Before I believe or share something, I will:

- ☐ **STOP** — Take a breath before sharing
- ☐ **CHECK** — Who made this? Is the source trustworthy?
- ☐ **SEARCH** — Can I find this somewhere else?
- ☐ **ASK** — Check with a parent or teacher
- ☐ **TRUST YOUR GUT** — Does it seem too good to be true?

Practice: What Should I Do?

Read each situation. Circle the best Fact-Checker Rule to use:

1. You see a funny video of a famous person acting silly.

Best rule: STOP | CHECK | SEARCH | ASK | TRUST YOUR GUT

2. A website says "FREE iPhone! Click Now!"

Best rule: STOP | CHECK | SEARCH | ASK | TRUST YOUR GUT

3. Your friend texts you something surprising about your school.

Best rule: STOP | CHECK | SEARCH | ASK | TRUST YOUR GUT

Write It In Your Own Words

Pick your two favorite Fact-Checker Rules and explain them in your own words:

Rule 1: _____ means...

Rule 2: _____ means...

Mini Museum Connection

When you visit the Mini Museum, look for the **stereoscope**—a machine from 1904 that makes flat pictures look 3D! People were amazed by this "magic." Now you know: it's not magic, it's a trick on your eyes!
